

Advanced Packaging Technology

The Company

**Senning – your specialist for packaging –
has been operating in the wrapping machinery
sector since 1949.**

The name of Senning has become internationally renowned for the overwrapping of folded paper and tissue products.

Our name is a guarantee of top quality and innovation. Reliability and service are promises we keep every day, all over the world.

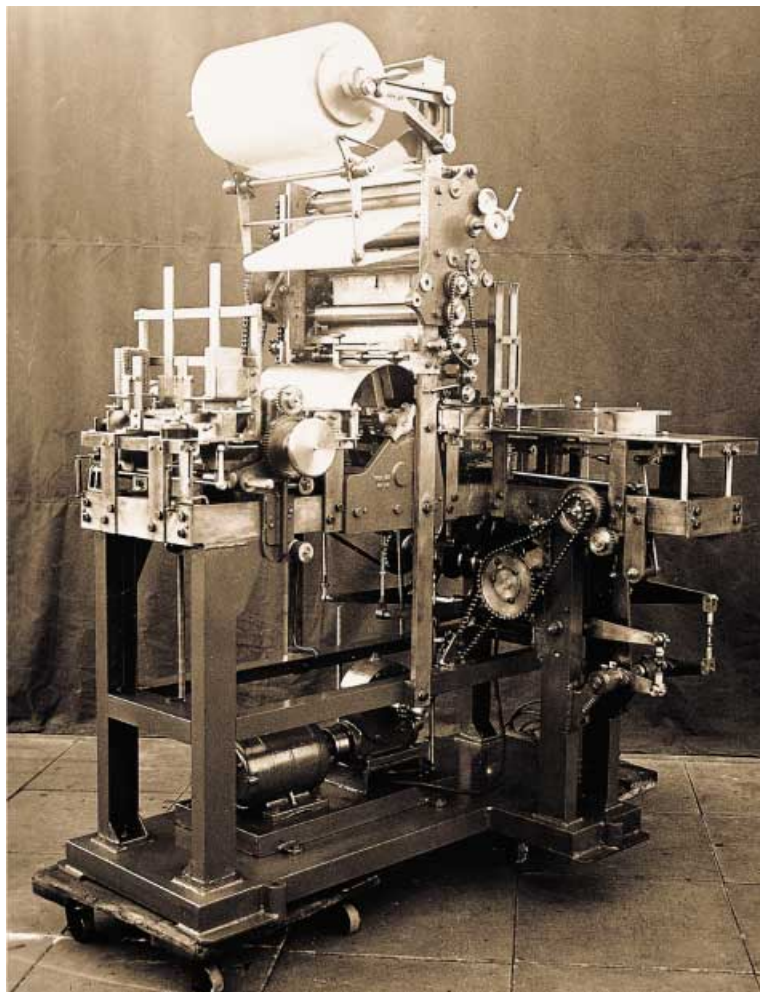

As a medium-sized family business, flexibility and solidity are our strengths.

History

The route from tobacco to paper.

Christian Senning, the company's founder, began repairing packaging machinery for the local cigarette industry in 1949. A short time later he built his own, new machines for cellophane overwrapping of consumer goods.

At the end of the 1950s the company ventured into the blossoming paper industry – and thus laid the foundations for future success.

By the 1960s Senning was already supplying machinery to the other European countries, to America, Africa, Asia and Australia.

Today more than 75 percent of our production is exported to a large number of countries all over the world.

A highly specialised market segment became our company's major success story.

Engineering and Assembly

From the idea through to the complete production line.

Our know-how is based on decades of experience, on technical creativity and on a feel for the products which our machines pack.

Typical Senning means "Made in Germany". It means realising all our customers' packaging requirements with the highest precision; uncompromising, individually formatted and for variable outputs.

Typical Senning also means our service does not end with the sale and delivery. Our engineers are right there whenever they are needed, round the clock, worldwide. Because modern-day production cannot tolerate standstill.

Location

Senning and Bremen – A perfect match.

The Free Hanseatic City of Bremen is a cosmopolitan, pulsating business and industrial centre in the north of Germany. It is a centre which upholds its traditions, which looks to the future and which admires the direct approach – just like Senning.

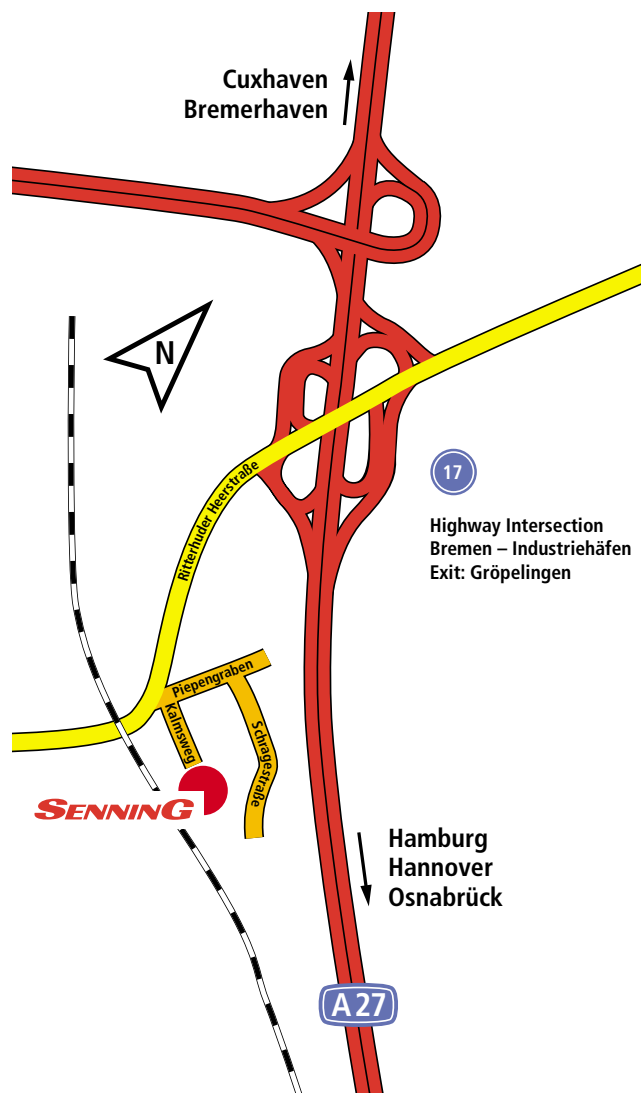

It is the home of leading international food, confectionery and tobacco products manufacturers as well as a large number of medium-sized businesses.

It is an environment in which we feel at home.

The Way to Senning

Arrival by car:

Take motorway A 27, leaving at exit Bremen-Gröpelingen. About 400 m from exit, at first traffic lights, turn left, then immediately right into Kalmsweg.
